Oxygen Generating Systems
Oxygen PSA - OS-20-78

- Typical Applications
  - Health care
  - Fish farming
  - Sewage treatment
  - Glass industry
  - Food industries
  - Sewage treatment
  - Pulp and paper industry
  - Welding, melting, brazing
  - Manufacturing batteries
  - Chemical oxidation

- Advantages of GENERON® OXYSWING PSA
  - Low operating pressures
  - No hazardous storage or connections
  - Low gas generating costs
  - Low operating cost
  - Fully automatic unattended operation
  - Two million plus cycle valves
  - Easy to install and maintain
  - Low dBA levels

GENERON® Oxygen PSA Generators separates oxygen (O2) from compressed air utilizing pressure swing adsorption technology. Compressed air, which consists of approximately 21% oxygen and 78% nitrogen, is passed through a bed of zeolite molecular sieve (ZMS). The sieve preferentially adsorbs N2 and moisture over O2 allowing the O2 to pass through as a product gas at pressure. While one of the towers is in the adsorption phase the other tower is regenerated by de-pressurizing, at which time the sieve releases the adsorbed gases to the atmosphere, and the cycle is then repeated.

A solid state programmable controller operates the process valves on an alternating cycle, with built-in logic for automatic stop/start. Oxygen flow and purity remain constant regardless of the peak usage demands. Under normal operating conditions and with correct maintenance the zeolite molecular sieve will have an almost indefinite lifetime.

*All performance flows are +/- 4%. All flows are shown at 68° F / 20°C.

- **Standard Components**
  - ASME adsorber vessels
  - Pneumatic/electric valves (two million cycle life)
  - Piping, gauges, and instrumentation
  - Safety valve
  - Oxygen pressure and flow regulators
  - PLC control system (Allen Bradley)
  - Steel wrap around skid mounted
  - Exhaust silencing muffler
  - Sound level < 90 dBA

- **Options**
  - Oxygen analyzer (with calibration kit)
  - Product flow meter
  - Inlet filtration package
  - Post filtration package
  - Auto shut down/startup mode (with manual bypass valve capability)
  - Auto standby mode
  - Off specification circuit
  - HMI Display Screen: displays inlet pressure, outlet pressure, system run status, O2 concentration
  - CFV activated carbon filter vessel

- **Special Options**
  - Master controller: PLC (Allen Bradley) driven for multiple unit operation
  - Enhanced PLC with telemetry
  - Enhanced HMI: Monitor Package (displays feed air, nitrogen product pressures, oxygen concentration, and product flow)
  - Compressed air buffer tank
  - Oxygen buffer tank
  - Product booster compressor
  - Dew point analyzer
  - Tanks & generator on a common skid
  - Custom engineered packages
